Clinical Pearls from a Modern Master

"When you stand a pole under the sun, you immediately see its shadow"

Dr. Richard Teh-Fu Tan began teaching the Balance Method after recognizing the frustration amongst his colleagues in the acupuncture community. Years ago, he recognized that many practitioners complained about the lack of clinical results, or the length of time that it took for patients to feel better. Yet, the classical texts state that the effectiveness of acupuncture treatments should be seen immediately, just as the shadow appears instantly when a pole is placed under the sun. Dr. Tan had an overwhelming desire to share this information, and he began to lecture about the classical methods of acupuncture which yield instant results. Years later, Dr. Tan is now renowned for sharing his knowledge to thousands of practitioners worldwide. He continues to lecture on the basics of acupuncture treatments, whilst constantly expanding his teachings for dedicated students.

Dr. Tan is a Master of Chinese Medicine who has a successful practice treating more than 120 people per week, built by word-of-mouth.

For his whole life Master Tan continues discovering and sharing his treasures of Traditional Chinese Medicine and Culture with no dissimulation.
